Grand Prize Drawing

Attendees will be eligible for an
Omaha Steaks prize package
drawing complements of MSI

Join the Midlands Midrange User Group, IBM and MSI Systems Integrators as we welcome Bob Schuster from IBM's Rochester Executive Briefing Center to discuss iSCSI and Blade integration for System i. IBM has extended industry-standard iSCSI technology to attach selected BladeCenter and System x models to the System i platform so you can exploit System i virtual storage, networking, and tape resources to help simplify the operations of your Windows or Linux Server system infrastructure.

Session topics

Several topics around iSCSI and Blade integration will be discussed including:

- Windows server pain points
- Overview of iSCSI technology
- Benefits of integrating Blade Centers with the System i
- How to integrate Intel and Blade Center servers with the System i
- Management and administration options
- Availability, backup and recovery options
- Live demonstrations of Blade Center integration

About the speaker

Bob Schuster is an 18-year industry expert, having served 15 of those years on the Advanced Technical Support staff as a Certified I/T Consultant. Bob has presented at numerous technical conferences, seminars, and user group meetings all over the country. In addition, he regularly participates in customer planning sessions and briefings at IBM Rochester and at customer locations. Bob's current work focuses on Windows integration with the System i, and high availability/disaster recovery.
